### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action or the MPEP.

#### ***Election/Restrictions***

Applicant's election with traverse of Group I in the reply filed on October 16, 2006 is acknowledged. The traversal is on the ground(s) that the claims are intertwined and not restrictable. This is not found persuasive because the composition is phrased as a composition "for application to the lips" instead of as a lip composition. In other words, the composition as claimed can be almost anything. In contrast, the method of use requires limiting the composition to application of the lips. In view of the different inventions, restriction is required.

The requirement is still deemed proper and is therefore made FINAL.

#### ***Claim Rejections - 35 USC § 103***

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krysik, US 5,330,747 in view of Castrogiovanni et al., US 5,505,937. Krysik discloses the PSA including the trialkylorganosilyl end blocked silica dioxide reacted with polydialkylorganosiloxane with the claimed viscosity and molecular weight. See column 2, lines 10+ of Krysik. Krysik discloses the use of the PSA in cosmetics applied to the skin and eyes. Krysik does not disclose the use of the PSA for lipstick, etc. Castrogiovanni is cited to exemplify the large body of prior art disclosing the use of PSA

Art Unit: 1615

for use in lipsticks. Accordingly, it would be obvious to one of ordinary skill in the art to use the Krysik PSA type cosmetic in lipstick in view that Castrogiovanni exemplifies that this technology is routine.
